New York City Parent Survey Findings

APRIL 2024

2024 Survey Methodology

Parents Survey

Edge Research conducted a custom, online survey among K-12 parents of students in public schools in New York City (n=508).

Quotas were employed to ensure a representative sample of NYC public school parents by gender and race/ethnicity. Quotas were based on American Community Survey (ACS) data for NYC public school parents.

Fielded April 3 - April 18, 2024

Sample Demographics:

34% of parents surveyed have children with learning differences and 15% suspect their child may have a learning difference

Note:

The overall sample size of the survey limits subgroup analyses; however, data were reviewed to note any directional differences or consistencies across geography.

Parents in New York City are most concerned about their child's well-being; academic concerns fall to the bottom tier

As a parent, to what extent do you worry about each of the following?

Worries

Extremely/Somewhat worried Extremely worried

Ranked by % Extremely worried

Hispanic parents are statistically significantly *more worried* than White parents on all items.

Among parents who indicate their children are below grade level in math or reading, math skills rise to the top

As a parent, to what extent do you worry about each of the following?

Worries of Parents of Children Below Grade Level in Math or Reading (n=80)

*Asked only of parents of children with learning differences (n=56)

Ranked by % Extremely worried

Parents of children with learning differences are more worried about all items, but academics remain in the bottom tier

As a parent, to what extent do you worry about each of the following?

Worries of Parents of Children with Learning Differences

Extremely/Somewhat worried Extremely worried

*Asked only of parents of children with learning differences

Ranked by % Extremely worried
